BOILER CLEANING SYSTEM**

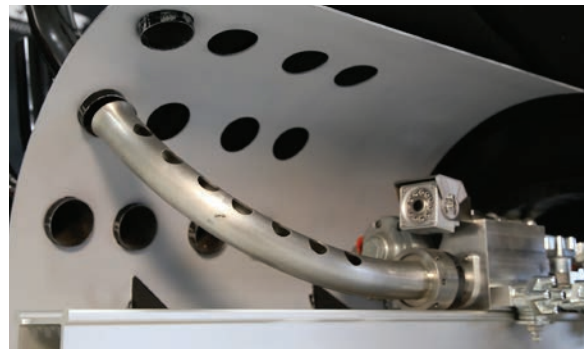

BTC

BOILER TUBE CLEANING SYSTEM

The StoneAge BTC-100 Boiler Tube Cleaning cleans radial tubes found in the mud and steam drums of package boilers. It fits through a standard manway and cleans boiler tubes without the need for an operator to enter the vessel. Helix Drive Technology delivers up to 50 lbs (23 kg) of push to clear plugged tubes and travel long distances through multiple bends.

UPGRADES:

- Now comes standard with a water/impact resistant camera system to help simplify tube indexing
- Now comes standard with a durable, lightweight hose containment drum for safe management and storage of high pressure hose

**WATER/IMPACT RESISTANT
CAMERA SYSTEM**

Helps simplify tube indexing. Now comes standard with every Boiler Tube Cleaning System.
